

Introduction to Applied Pediatric and Adolescent Nutrition

Hasbro Children's Hospital—Providence, RI

Wednesday, October 11, 2023

Course Overview:

This course will provide health professionals (RDN, DTR and / or dietetics student) with current information on pediatric nutrition. Knowledge obtained from this course will provide the participant with:

- Pediatric nutrition assessment and interview techniques.
- Introduction to pediatric Irritable Bowel Disease.
- Overview of human milk, infant & pediatric enteral formulas.
- Review common pediatric conditions (diabetes, celiac disease and selective eating), explore nutrition treatment impact.

Program has been approved for 6.75 Level 2 CPE's through the Commission on Dietetic Registration

Learning Objectives:

- Select and utilize appropriate nutrition assessment and interview tools to guide assessment, intervention and management of pediatric nutrition in acute care settings.
- State the fundamentals of infant and pediatric enteral formula composition and applications for use.
- Summarize key nutrition considerations for pediatric diabetes sub-types, food selectivity and celiac disease.
